Back to Work...

As we head back to work it is important that our workforce and customers are protected to our best ability.

EFFICIENT POWER TECH

FeverSafe
Thermal Screening Solutions

Let's keep them SAFE....

- Employee/Visitor Screening at entrances
- Automated Global Process
- Anonymous and Face Recognition Options
- Notification and history reporting through Global Portal
- Handheld economy solution

Thermal Screening will last long into the future in our daily lives. It is important to find a partner that provides a solution capable of automated functionality along with a global report out for history and actions.
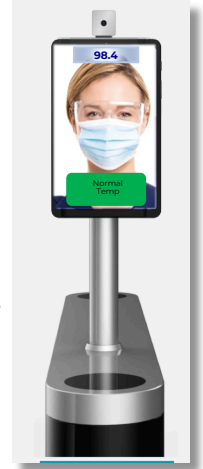

Entrances

The **IR Sensor Model works on a wireless network with a Samsung TabActive Pro.**

- Temporal IR scan kiosks at entrances
- High accuracy(+-.3%) thermal imaging stations
- Notification and escalation engine
- Anonymous Facial Recognition
- Reports
- Low Cost
- 2-3ft range

Ask us about the solution that is right for you!

The Mini Camera Model works on a wireless network with a Samsung Monitor.

- Thermal Camera provides walk through scanning of each student when entering building
- High accuracy(+-.3%) thermal imaging stations inclusive of Samsung SOC Screen
- Notification and escalation engine
- Facial Recognition
- Reports
- 6ft range
- Customer Portal for Reports and Notification and escalation engine
- Full Facial Recognition via VSBLTY
- Interface to Custom App and Student Database

Portable All In One Cart

We have taken the Mid Range Solution and transformed it to a convenient portable Thermal Scanning Solution with no loss of functionality.

Plug and go!

The Mini Camera Model works on a wireless network with a Samsung Monitor.

- Thermal Camera provides walk through scanning of each student when entering building
- High accuracy(+-.3%) thermal imaging stations inclusive of Samsung SOC Screen
- Notification and escalation engine
- Facial Recognition
- Reports
- 6ft range
- Customer Portal for Reports and Notification and escalation engine
- Full Facial Recognition via VSBLTY
- Interface to Custom App and Student Database

Mini Camera Model

The Mini Camera Model works on a wireless network

Thermal Camera provides walk through scanning of each person when entering building

- Rotation arm to move camera into place.
- Capture optical video of the seats when not scanning for temp
- High accuracy(+-.3%)
- Email or Text Notification to parents and Admin in high temp situation with escalation engine
- Facial Recognition if tied to your database
- Direct global data via cell router to cloud
- 6ft range
- Customer Portal for Reports and Notification and escalation engine
- Interface to Custom App and Employee Database
- Durable high bright screen
- Ease of use

Handheld Solution

KEY BENEFITS:

Connected Thermal Fever Solution

Contactless Fever Measurement

Daily Temperature Report Generation

Real-time Fever Detection

All readings stored in Cloud
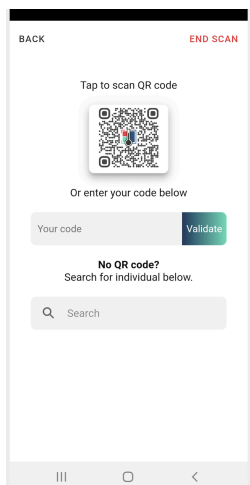

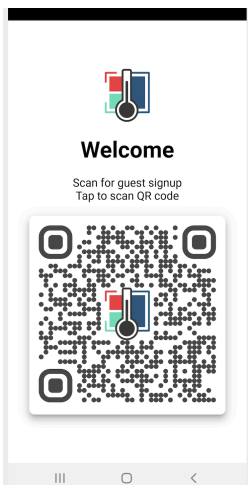

App receives temp via Bluetooth

QR Code Check In People Counting

Notification and Escalation Engine

BODY TEMP
36.6 °C
HOLD

Feedback Specifications:

- Fever classification and Instant Feedback on App
- Real Time Dashboard
- Historical Reports
- Automatic reading update to cloud platform
- Alarms and notifications

Connected Thermal Camera Fever Screening Solution

People Counting

- **Scope of work:** Camera will be mounted by entry door and exit door. A Samsung Screen will be mounted by Entry Gate. The Samsung Screen will give direction to enter venue or to wait until space opens up.

Individuals in venue
- 6 individuals in venue
- 8 individuals may enter

8 individuals may enter

Hourly Summary

0
individuals too many in venue

14
individuals maximum allowed in venue

Weekly Summary

50/50
Venue at full capacity
Please wait for someone to leave the venue before entering.

Thank you

What Else can we do for you?

This investment will provide value long after COVID-19

TRACK THREATS
AI Gun Detection with early notification

IDENTITY CORRABORATION
Detect Employee timestamp attendance

TEMPERATURE
Protect secured entrances with thermal Cameras. Attach Temp Readings to Employees. Monitor Customers for Temperature

REAL-TIME ANALYTICS
Measure the impact of traffic, contractors, visitors and Persons of Interest.

ADVANCED FRICTIONLESS ENTRY MONITORING
Access Control and Management, for employees and patrons alike.

KNOW THE METRICS
Monitor alerts, entry statistics and people counts 24/7

Value Proposition
Automated Integrated Platform
VS
Stand Alone Solution

There are many temperature solutions on the market....

- Effective and Accurate Human Temperature Sensing +/- .1%-.5%
- Integrated IoT Solution allows for Recording and Storage of Data Points
- Seamless integration to Customer Data Bases
- Facial Recognition with integration to Employee Data Base
- White label portal for customer access to the data base
- Notifications, email or text immediate automated from portal
- Architecture can be added to in phases to wearables, people counting etc.
- Customer/Employee facing Samsung screen with CMS for triggered content
- Screens can be integrated with programmatic marketing content, can pay for the system through marketing content.
- Reduce human Control and provide an automated solution
- Future Utilization of IoT Platform and Portal

WHY THE Efficient Power Tech Solution?

- Integration to Samsung Smart Watches
- Core Temperature Medical device for day long temperature monitoring
- App loaded on smart watch for Proximity notification for Social Distancing
- Records of all in contact inside of social distancing thresh holds
- Utilize private ATT Cellular network not having to access company network
- System is agnostic so platform can work with multiple camera solutions providing ample inventory
- Efficient Power Tech can provide a full turnkey solution including installation and support after installation
